Who am I? I guess phrases like "beats me" and "who really knows who they are" won't do for your understanding of what possessed me to present this book to you. So I guess I'll have to go a little further. My history includes a very early calling to the ministry, at the age of 13 (I am much, much older than that now) and subsequent sealing at the age of 17. I went on to study at the University of Chicago in the department of special studies to obtain a degree in history and philosophy of religion. I became very accustomed to asking God the question "Why?" and so I did in the formation of this book. I wasn't content that mankind is; I wanted to know why mankind is. And since mankind is, what will mankind experience and what will mankind become? So this is who I am.
